

At the Aging and Disability
Resource Center of Racine

County (ADRC) we have trained Information and Assistance Specialists who help people identify their need, sort through options and make choices that are best for them. Staff is available to meet with people at the ADRC, discuss issues over the phone or meet with people in their home.

Often people contact the ADRC with a question about public and private benefits or insurance. At the ADRC there are Benefit Specialists who help people with disabilities and older adults apply for public benefits.

Aging and Disability Resource Center

What can the ADRC do for you?

We ask people to talk to us about their concern for themselves or a family member or friend. Once we understand their individual situation, we help them:

- Learn about programs and services
- Decide what options are best
- Apply for benefits (if needed)

ADRC services are available to individuals, concerned family members, friends, or professionals working with issues related to aging, physical disabilities, developmental disabilities, mental health issues, or substance use disorders.

Our professional staff will help you make informed choices about long term care options. Examples of some common issues and concerns people have are:

“My Parent has become very ill and unable to care for themselves, what can I do?”

“I am caring for my aging parent and I need a break, is there assistance for this?”

“What options does my developmentally disabled son/daughter have now that they are graduating from high school?”

“My relative has been severely injured in an accident and unable to meet their own care needs, where can they go, what should be done?”

Mission

The mission of the ADRC is to support seniors, adults with Disabilities and their families and caregivers by offering easy access to services and by fostering a caring community that values lifelong contributions, maximum independence and individual dignity.

Vision

Promoting “quality of life” by offering information, support and options.
